

aprile

aprile is a suspended seat, inspired by springtime and shaped to resemble a petal, designed to bring an element of playfulness and joy to every kind of environment: from homes to offices, from hotel lounges to high-end restaurants.

A surprising element of interior design that conveys an idea of impalpable lightness, while being very sturdy: the quality ironware, almost invisible, allows **aprile** to sustain a load of up to 1,480 kg (3,263 lbs).

Part of its playfulness comes from **aprile** resembling a swing, but its four suspension rods limit the swinging radius, making it safe for all spaces and users. Its simple lines allow it to effortlessly match different styles of interior design. **aprile** is handcrafted in Rome, Italy, by skilled artisans.

CATEGORY

Hanging seat

YEAR OF DESIGN

2022

AVAILABLE FINISHES (SEAT)

terra: wax polished solid canaletto walnut.
nuvola: matte-white lacquered high density wood.

PRODUCTION PROCESS

The seat is obtained through the progressive carving of an original and unique solid walnut wood monolith in the terra version (or high density wood in the nuvola version). This allows for the creation of a flawless shape. The seat is then sanded and polished by hand. The supporting steel ring is handmade to perfectly and seamlessly clip onto the seat.

ENVIRONMENT

aprile is designed for indoor spaces.
Please note it can't be installed on plasterboard ceilings.

ASSEMBLY

aprile needs assembly in order to be secured to the ceiling. Provided are all necessary elements for installation:

- support ring
- cone terminals
- suspension rods
- concrete sleeve anchors
- o-rings
- nuts and bolts
- drilling template
- handmade masking cap
